Education

Dr B R Ambedkar National Institute of Technology

Bachelor of Technology in Chemical Engineering

June. 2021 – June 2025

Jalandhar, Punjab

Experience

ENTNT

May 2025 – Present

PMS Admin

Remote

- Managed and structured **10,000+ spare parts records** by creating vessel profiles in ERP using Excel and SQL for accurate PMS setup.
- Ensured **98%+ data accuracy** in spare-parts mapping in Task Assistant (PMS tool) by reviewing data gaps and improving data consistency.
- Processed and implemented **50+ data change requests per month** from ship and shore teams; recommended database corrections and improvements.
- Worked with data from multiple **major international shipping companies**, gaining experience with large-scale operational datasets.
- Used **Excel and SQL queries** to improve reporting accuracy and reduce manual work.

Career Vyas

Oct 2022 – Jun 2023

Operation Analyst Intern

Jalandhar, Punjab

- Analyzed operational data and process metrics to identify inefficiencies, contributing to **30% improvement** in workflow efficiency.
- Supported **data-driven decision-making** by preparing reports that helped improve overall operational visibility by 25%.
- Collaborated with different teams in 35+ brainstorming sessions, improving **problem-solving** and communication skills.

Technical Skills

Languages: Python, SQL

Data Analysis: Statistical Analysis, Data Cleaning, Data Visualization

Tools: Power BI, SSMS, Microsoft Excel

Projects

Technical Management System (TMS) – Data Operations — *Excel, SQL, ERP Systems, PMS Tool, Data Cleaning*

- * Extracted and cleaned large-volume spare-parts datasets (**5,000+ records**) from raw source files and transformed them into structured, ERP-ready formats, improving data usability and reporting accuracy.
- * Performed detailed spare-parts mapping in the **PMS tool**, identifying data gaps, verifying consistency, and correcting mismatches, resulting in **95–98% data accuracy** across vessel maintenance records.
- * Created complete vessel profiles in the **ERP system**, including components, manufacturers, and technical details.
- * Reviewed and handled **data change requests** submitted by ship teams to keep the database updated and accurate.
- * Applied systematic data validation and standardization rules, **improving overall data quality** and reducing manual verification effort by **30%**, leading to more reliable maintenance scheduling and **inventory planning**.

Monday-Coffee Data Analysis — *SQL, MySQL Workbench*

- * Conducted in-depth **data analysis** of coffee sales, **customer behavior**, and market trends using **MySQL**, providing insights that supported strategic business expansion.
- * Calculated **sales growth rates** and performed a **market potential analysis**, identifying the top 3 cities with the **highest sales** and opportunities for expansion.
- * Designed and executed SQL queries to analyze **sales metrics**, including **top-selling products**, city-level consumption patterns, and **customer segmentation**.

Achievements

- * Earned the **SQL 50 Badge** on LeetCode
- * Achieved **SQL (Intermediate) Certification** on HackerRank

Leadership / Extracurricular

Dramatics Club

June 2024 – June 2025

Head

- * Led a team of almost **50 members** in organizing and executing various successful theatrical productions.
- * Managed the club's budget, including sponsorships and **expense tracking**.
